## *Why tutors recommend being a tutor:*

*"Because of my English, I thought that this course was difficult at first, but I stayed in the class and I'm glad. Now I'm studying at the university to be a teacher."*

*"I never thought of helping people to learn while I was learning. I thought you had to be an expert to help anyone. I have learned a lot from helping the students."*

*"I didn't have a lot of education in my country and didn't think I could help at a school. I have learned a lot helping other people and I feel great that I can help them."*

*"I am not the same person that I was when I started this course. Now I can better help my child with school and am confident to do many other things with my English."*

*"I couldn't have gotten my present job without this course."*

*---Personnel Manager, County Inspector, School Principal, Teacher's Assistant, Cashier, Teacher, Substitute Teacher, Television Producer*
